
Dissolved Organic Matter Dom Properties Applications

dissolved organic matter (dom) concentration and quality ... - dissolved organic matter (dom) in potential watershed sources is critical for explaining and quantifying the exports of dom in stream runoff. here, we examined the concentration and quality of dom for ten watershed sources in a 12 ha forested catchment over a two-year period. dom composition was evaluated for: throughfall, litter leachate, soil **dissolved organic matter (dom) in aquatic ecosystems** - dissolved organic matter (dom). what is it and why study it?preface and acknowledgements by contract evk3-ct-2000-00034 the european commission initiated in january 2001 the 36 months research project "dis- solved organic matter (dom) in coastal ecosystems: transport, dynamics and environmental impact" (domaine.ku)*. **tree-dom: dissolved organic matter in throughfall and stemflow** - dissolved organic matter (dom) is a master variable in ecosystems. in soils, dom affects the stabilization and distri-bution of soil carbon, soil microbial activity and function, and soil development processes (jansen et al. 2014). in natu-ral waters, dom fuels microbial production, influences **sources of dissolved organic matter (dom) in a rocky ...** - dissolved organic matter (dom) is an important vehicle for the movement of nutrients from terrestrial to aquatic systems. to investigate how the source and composition of aquatic dom change in both space and time, we used chemical, spectroscopic, and isotopic analyses to **biodegradability of dissolved organic matter in forest ...** - high concentrations of dissolved organic matter (dom) were leached into rainwater passing through the canopy and forest floor of an oak (quercus spp.)-hickory (carya spp.) forest in the southern appala-chian mountains. more than 95% of this dissolved organic c (doc) and n (don) was removed as water percolated through the soil profile **fingerprinting sources of dissolved organic matter (dom) - fingerprinting sources of dissolved organic matter (dom) • study background • brief fluorescence theory • importance of dom • qc of fluorescence data • preliminary results** **dissolved organic matter (dom) release by phytoplankton in ...** - dissolved organic matter (dom) release by phytoplankton in the contemporary and future ocean daniel c.o. thornton department of oceanography, eller o & m building, texas a & m university, college station, tx 77843-3146, u.s.a. **dissolved organic matter (dom) concentrations and quality ...** - dissolved organic matter (dom) concentrations and quality . for watershed compartments . in a forested mid-atlantic watershed, usa . by . nina finger . a thesis submitted to the faculty of the university of delaware in partial fulfillment of the requirements for the degree of master of science in geology . **dissolved organic matter (dom) - microbe interactions** - dissolved organic matter (dom) - microbe interactions christian lønborg swansea university, college of biosciences, swansea, uk **source characterization of dissolved organic matter in a ...** - measurements of dissolved organic carbon (doc), uv-visible, fixed wavelength fluorescence, and synchronous fluorescence were performed in an effort to characterize spatial and temporal variability in concentration and source of dissolved organic matter (dom) in surface waters of the southwest coast of florida. concentrations of doc in the surface **topic: dissolved organic matter - university of florida** - topic: dissolved organic matter learning objectives define dissolved organic matter [dom]/ carbon define terminology / nomenclature explore components and characteristics of dom wbl pp explore sources and fate of dom discuss ecological role of dom in wetlands case study: dom in everglades 6/22/2008 2 **dissolved organic matter in wetlands - university of florida** - dissolved organic matter (dom) consists of soluble organic materials derived from the partial decomposition of organic materials, including soil organic matter, plant residues, and soluble particles released by living organisms, including bacteria, algae, and plants. dissolved organic matter is easily identified as it is responsible for the dark **dissolved organic matter (dom) in the wais divide ice core** - of dissolved organic matter (dom) and particulate organic matter. analysis of the ice core will allow us to develop a series of interrelated climate and biologic records focused on understanding interactions of atmospheric global systems throughout history.
